

Fungal Planet 1067 – *Calvatia baixaverdensis*

FP1067 The ITS nrDNA consensus phylogenetic tree was obtained with a Bayesian analysis using MrBayes v. 3.2.7a (Huelsenbeck & Ronquist 2003) under T92+G+I evolutionary for 5 M generations. The new species is in red. The posterior probabilities greater than 0.9 are indicated on the branches. *Bovista paludosa* was included as outgroup.
